

One Laptop Per Child: Objectives and strategies

Ing. Zdeněk Brož, Department of economics, Faculty of Business and Management, Brno University of Technology, broz@fbm.vutbr.cz

Abstract

This paper focuses on the objectives and strategies of the One Laptop Per Child project. Article contains information about the vision, objectives, principles and about the strategies of the project. The project uses a very special approach to most of the problems. This is due to the fact that a commonly used approach would probably fail to meet the project objectives. The OLPC project aims to improve the education in many countries all over the world.

Keywords

Education, e-learning, management, objectives, strategy, IT
